

## Process Engineer

### Company activity

Millions of glass bottles, cans and PET containers pass through a filling line every day.

Service EAST LLC performs works on installation, assembly, maintenance and servicing of equipment in the food, medical and chemical industries.

Our main activities are installation, upgrade, overhaul and repairs of bottling lines for water, beer, juice, oil, wine, milk and bulk materials of different consistencies.

All of this requires a highly qualified and motivated team of specialists. Our team consists of world-class specialists who have the knowledge and experience to handle high-performance machines and complex projects in the filling and packaging industry. From the inquiry to project management to implementation by our specialists, we offer everything from a single source.

Friendly interaction, experience and quality are our top priority.

With us you will work in a respectful environment and you will be able to rely on competent colleagues.

### Job conditions

- Full-time working
- Deserved salary, annual bonus
- Health and life insurance
- Vacation 24 days/year
- Corporate English classes

### Job responsibilities

- microbiological validation of filling plants at customers' sites worldwide, as well as documentation of system parameters
- microbiological validation of aseptic bottling plants or technological commissioning of partial plants, as well as overall plants of low and medium complexity with customers worldwide
- validation and support of the process engineering commissioning of aseptic filling machines
- re-validation of filling machinery after overhauling and retrofitting (LCS)
- microbiological consulting and hygiene management at customers on site
- clarification of microbiological methods in the context of customer orders
- accompaniment of process engineering realizations (process qualification)
- plant and process qualification ("dry" or "wet" Aseptics) and definition of consumption and warranty values from a procedural point of view and in terms of formulations and manufacturing processes
- support of the plants during the product life cycle (LCS and retrofits)
- troubleshooting in the case of microbiological incidents as well as for the IMO / AMO and at the customer's site
- optimization and adaptation of the process parameters in consultation with the professionally responsible and/or cooperation in engineering contracts
- implementation of customer specifications on site
- collaboration on new developments

- advice on the technology/energy optimization of existing systems
- advice and conduct training for the customer to operate the systems or laboratory staff as well as responsible knowledge/training of new employees
- support and training of quality management provided by the customer
- performing required tests (e.g. Germ Reduction tests as well as technological acceptance and function tests-FAT tests)
- preparation of the documentation of validated plant parameters, hygiene measures, etc. as well as process and process description
- microbiological and chemical-technical laboratory work
- hygienic design
- support of the AMO regarding microbiological acceptance
- support of product specialists / sales in order clarification
- quality control of performed projects
- reporting to the project manager and the management
- create daily reports, service reports, inspection reports after works fulfillment

### Job skills and qualification

- high technical education; completed vocational education in the field of mechanical engineering/ mechatronics technician with subject-specific additional qualification
- completed technical studies with a focus on process engineering, beverage, food, biotechnology or pharmaceutical technology or completed relevant training with further training as a technician
- knowledge of Krones/ KHS/ Sidel equipment
- four years of professional experience desirable
- first experience in the fields of beverage microbiology or cold aseptic filling technology
- experience in the commissioning of process plants, ideally in the field of food technology
- advanced user of PC, Outlook, and other MS Office programs (Word, Excel)
- independent, self-responsible, structured and goal- and result-oriented, pragmatic way of working, as well as enjoyment of working together in global teams
- reliability, flexibility
